DETAILED ACTION

Response to Arguments

Applicant's arguments, see the remarks, filed 11/23/2005, with respect to the rejection(s) of claim(s) 23-31 under 35 U.S.C. 102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Willis (US 5,152,789).

Drawings

The drawings were received on 11/23/2005. These drawings are accepted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 32, 34, 45, 47, 48, 59 and 60 are rejected under 35 U.S.C. 102(b) as being anticipated by Willis (US 5,152,789). Willis discloses an intraocular lens (fig. 2) for insertion into a capsular bag of an eye (as seen in fig. 1), comprising: a deformable optic (abs.) having a periphery and centered about an optical axis, the optic adapted to focus light toward a retina of an eye (the inherent function of an IOL); and an accommodation assembly coupled to the optic (14), comprising: a circular rim (18) surrounding the optic and spaced therefrom, the circular rim configured for implantation within a capsular bag of an eye (as seen in fig. 1); and at least three

Art Unit: 3738

intermediate members (16) extending between and connecting the optic(at 26) and the circular rim (at 28).

With regard to claims 34 and 48, each intermediate member of the at least three intermediate members is attached to the periphery of the optic along a radial line passing through the optical axis and through the center of the intermediate member (as seen in fig. 2).

With regard to claims 45 and 59, the intermediate members, optic, and outer ring are integrally formed of one material (1st paragraph of the summary).

With regard to claim 47, the accommodation assembly is structured to cooperate with the eye to effect deformation of the optic (inherent since the optic is deformable and member 16 transmit force to the optic).

With regard to claim 60, the plurality of intermediate members comprises three intermediate members (there are three even though the device does not consist of only three).

Allowable Subject Matter

Claims 23-27 are allowed.

Claims 33, 35-44, 46, 49-58 and 61 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
